

MOBILE LIBRARIES

Since 1982

The Mobile Library program has been serving children and adults since 2000. 14 Mobile libraries serve 103 sites in seven provinces of Cambodia each week, offering activities around reading and writing, provide book-lending service, and also tutoring and information on crucial social issues.

READING PROMOTION

Each Mobile Library is equipped with books and educational materials. Reading and educational sessions are organized from Monday to Friday in targeted sites where children could listen to storytelling, play educational games, read and borrow books.

AWARENESS

Four Mobile Libraries are specialized in specific themes in order to promote awareness on Yoga and Mindfulness, STEAM, Road Safety and Environment. Beyond these topics, our mobile librarians are also promoting awareness on WASH (Water, Sanitation, Hygiene and Health), Family Planning, Money Management, etc.

MICRO-LIBRARIES

To give a permanent access of books for children, we have been developing a network of micro-libraries by working closely with community volunteers, who are now managing as many as 35 micro-libraries with 200 to 300 books. Our teams provide them with technical support on library management, as well as storytelling and awareness sessions on various topics.
